

Energy Efficiency Services Limited
A JV of PSUs of Ministry of Power, Govt. of India

Creating an Energy Efficient World

Advt Ref No.: EESL/0320/22

Date: 17/08/2020

NOTICE

SUB-Appointment of Head (Convergence) in EESL on Contractual basis.

Applications are invited from eligible executives for appointment to the post of **Head (Convergence)** for Energy Efficiency Services Limited to be posted at the Corporate Office of EESL presently in New Delhi on contractual basis.

A- Company Profile: - EESL is a Joint Venture Company of NTPC Ltd., Rural Electrification Corporation Ltd., Power Finance Corporation Ltd. and Power Grid Corporation of India Ltd. EESL is set up to create and sustain markets for energy efficiency in the country.

B- Background: The energy sector, in particular Power sector, is moving towards a transition not witnessed in over a century. The time honoured standard wires and transformers business centralised power units through large country level grids, is giving way to a decentralised, intermittent and dispersed systems. It is estimated that the energy demand will rise (in 2040) by almost one quarter, due largely to population growth and urbanization. Further, more than 40% of the energy supplied will be from Renewables as countries pursue decarbonisation as compared to a global average of around 20-25% as on date.

Energy Efficiency Services Limited (EESL) has set up a vertical that combines the decentralized solar business, EV and EV Charging and upcoming sectors like Battery Energy Storage and Carbon Finance. The vertical is likely to be hived off as a 100% EESL owned SPV (Special Purpose Vehicle). The SPV will play the role of “value-enhancer”, by creating the “convergence” and their opportunities through conceptualizing and piloting new business models, innovative financing structuring, working on the policy framework where necessary, and in general pushing boundaries making new markets possible. This includes finding ways to add additional revenue streams, innovating business models to achieve investability, using multiple sources and types of capital – including from multilateral and bilateral agencies, philanthropies and other

entities. Without a dedicated effort at breaking such sector boundaries, not only will silos continue but the opportunity to break sector boundaries and demonstrate a new way to make low carbon, resource efficient growth will be missed.
