## ENTREPRENEURSHIP DEVELOPMENT AND EMPLOYMENT GENERATION IN LIVESTOCK FARMING

Dr. Rajesh Kumar

Livestock plays a major role in enhancing the income of farmers in combination with agriculture. As per current scenario in Indian economy, livestock is the back bone of the agriculture because for the livestock there is no need of extra feed grown. It totally depends on the byproduct of agriculture. Approximately 20.5 million people depend upon livestock for their source of income. An average of 14% of all rural households, livestock contribute 16% to the income of small farm households. Two-third of rural population gets livelihood through livestock. Livestock provides employment to approximately 8.8% of the population in India. India has huge livestock resources.

**The livestock provides the following benefits:**

- ♦ **Food:** The livestock provides Milk, Meat and Eggs for human consumption which is highly nutritious.
- ♦ **Wool:** The livestock especially Sheep, Goat and Rabbit contribute to the production of best quality wool and hair.

- ♦ **Draught Animals:** Bullocks are very useful in Indian agriculture. For various agricultural operations in rural areas, farmers still depend upon bullocks. By use of bullocks we can save a lot of fuel which is a necessary input for using mechanical power like tractors, combine harvesters etc.
- ♦ **Capital Resource:** During emergen-

cies and draught condition livestock serve as capital for landless agricultural labourers.

**Role of livestock in farmers' wealth**

In mixed farming system livestock plays a significant role in the wealth of farmers. The livestock serve the farmers in following ways.

- ♦ **Income:** Livestock is a source of

income for many families by providing regular income to the livestock farmers through sale of meat, egg and by products like skin, hair and bones etc. during emergencies like treatment of sick persons, children education, repair of houses etc specially poultry serve as sources of regular income and provide economic security to the farmers.

- ♦ **Employment:** Most of people in India depend upon agriculture for their livelihoods. Since agriculture is seasonal in nature, it cannot provide employment throughout in a year. The landless and less land people depend upon livestock for utilizing their labour during draught season.

- ♦ **Social Security:** Establishment of poultry farms and rearing of animals offer social security to the owners in terms of their status in the society.

**Objectives**

1. Sustainable growth and development of livestock sector, including poultry.
2. Establishing convergence and synergy

## CAREERS IN MEDIA MANAGEMENT

Nidhi Prasad

Media today has become a primary source of information for the people of the Country, with the invasion of different platforms of Media, people today can switch to Television, Print and Internet for information, and this trend is growing day by day, with the DTH, Print (mainly Newspapers and Magazines) and the most easily available of them all the Internet there are almost limitless opportunities to the future generations in the field of Media Management, this article of mine focuses on the opportunities that this exciting as well as challenging field offers.

There was a time when only Radio, Newspapers and Journals etc. were the main sources of information for the society at large. Now electronic media is progressing well in the Country, so nature and scope of media is also changing. In present day scenario, Media has its own role in the Social and Economic development of the Country.

In India, media plays an important role

in affecting the mindset of the people. People watch television and they tend to adapt many things which they see on television. Media is responsible for the coverage of India's growth in all aspects. It tells about the economic growth, local development, latest projects and government involvement in all what is possible. The role of media cannot therefore be denied in the growth of the nation.

The Indian Media and Entertainment (M&E) industry is a sunrise sector for the

economy and is making high growth strides. Proving its resilience to the world, the Indian M&E industry is on the cusp of a strong phase of growth, backed by rising consumer demand and improving advertising revenues. The industry has been largely driven by increasing digitization and higher internet usage over the last decade. Internet has almost become a mainstream media for entertainment and information for most of the people.

India's media consumption has grown at

a CAGR of 9 per cent during 2012-18, almost nine times that of US and two times that of China. The Indian advertising industry is projected to be the second fastest growing advertising market in Asia after China.

Nearly 40 per cent of our 'media interactions' take place on smart phones, as smart phone users spend close to 160 minutes (source: Nielsen Mobile Informate Insights) on their mobile phones, which is higher than the time they spend on TV.

**WHAT IS MEDIA MANAGEMENT?**

Media is a very broad term and media industry currently ranges from radio, television, film, music, multimedia, online/digital media and publishing to fine arts, advertising, public relations, journalism, e-commerce, etc. and even the management portion is also included in it.
